AFTER SCHOOL ACTIVITIES**3:30-4:30 p.m.****Makerfuse****Tuesday** _____Cost is Ksh.9,500 payable to **Alois Mbutura**

WHAT IS MAKERFUSE?

Makerfuse is a nation wide scaleable program in schools led by young engineers meant to improve learning by giving children a fun means to learn about everything STEM(Science, technology, engineering and math). The program is run as a club in the School of the Nations and Pembroke House school, Gilgil.

WHAT ACTIVITIES HAPPEN IN THE CLUB?

Each school term, the children have 2 projects to work on, one is a group project and a fun individual project that they can take home.

The children are grouped into teams and work on fun projects such as Making a gaming cabinet, making an automatic Simon says game and even as wild as making a playstation controlled water jet. Eventually we aim to make a builder and a maker out of every child while equipping them with hands on skills irregardless of their future career path.

All materials are specially manufactured by us at Makerfuse.

FROM WHAT GRADE CAN MY CHILD JOIN?

The club is available for children from Year 7 till 10 but we can make exceptions for passionate children in Year 6.

WHAT IS THE CLUB FEE?

9500 KES.
